[QMainePolicy1] Maine’s current policy allows transgender students to participate in sports with the gender with which they identify rather than their biological sex. This means students born as biological males may play on the girls’ or women’s team if they identify as a girl or woman. Some have proposed instead requiring that students participate in sports on the team that aligns with their biological sex, reserving women’s and girls’ sports exclusively for students who are biological females. Would you support or oppose such a ballot measure?

[QStudentInformation] Recent evidence has emerged that 57 public-school districts in Maine withheld information from parents about students' desire and efforts to change their gender identity if the parents were believed to be unsupportive of that change. Do you think school administrators and teachers should be permitted to withhold information about a child's health from their parents if the district is concerned that the parent will disagree with the transition?

[QProtectWomen] Young women should be protected in school, not forced to compete against biological men in sports competitions, because doing so can be harmful to women and girls. Do you agree or disagree with this statement?

[QCompassion] While it is good to be compassionate toward young people questioning their gender identity, it should not come at the expense of the female student athletes who face unfair competition and harm from having to compete against biological men. Do you agree or disagree with this statement?

[QMainePolicy2] Now that you have heard a little more about the issue, would you support a ballot measure to require that students participate in sports on the team that aligns with their biological sex, reserving women's and girls' sports exclusively for students who are biological females?
